Challenge

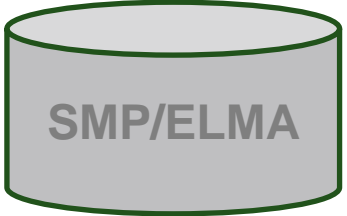

The goal

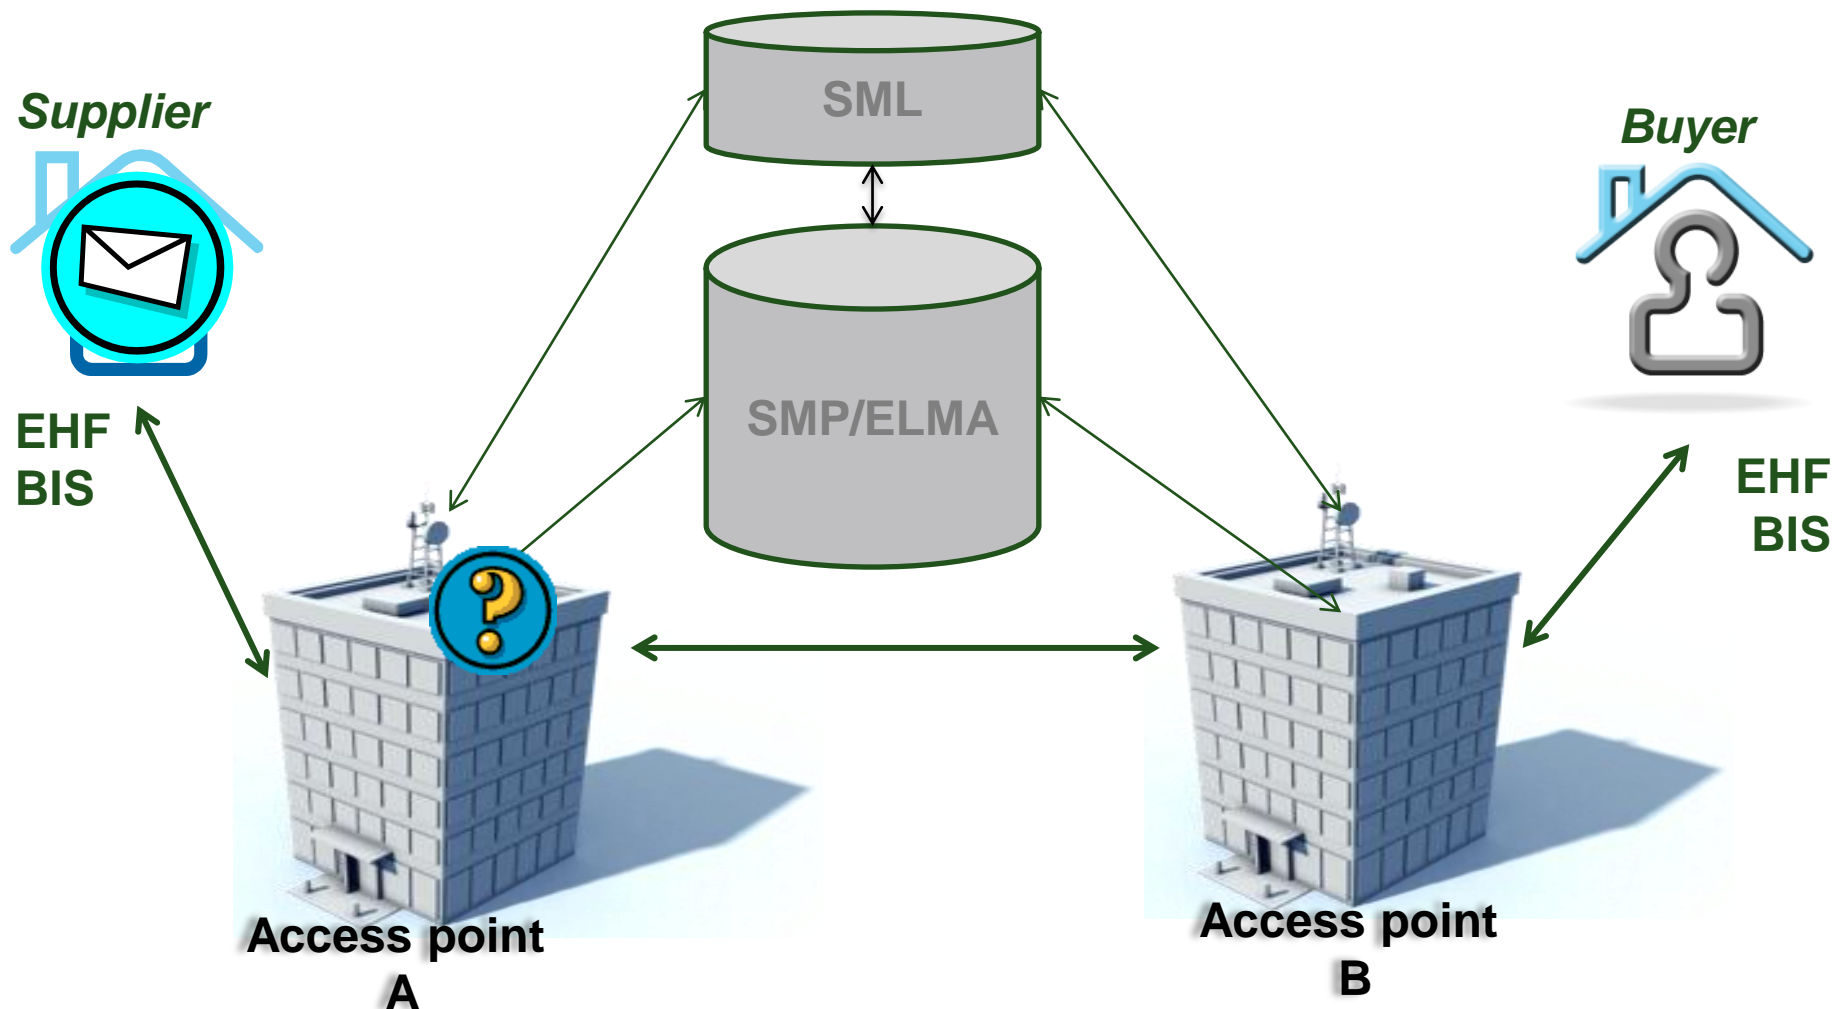

Access point components

Access point

Access point infrastructure

Norwegian approach

Norwegian approach for e-Invoicing

1. Do e-invoicing mandatory for public entities

2. Standard e-Invoicing format, based on European standards

3. On boarding ERP vendors/invoice systems.

4. Establish one national document receiver base = SMP/ELMA.

5. On boarding access point.

6. Establish web portals for writing invoices online to SME.

7. Marketing activities.

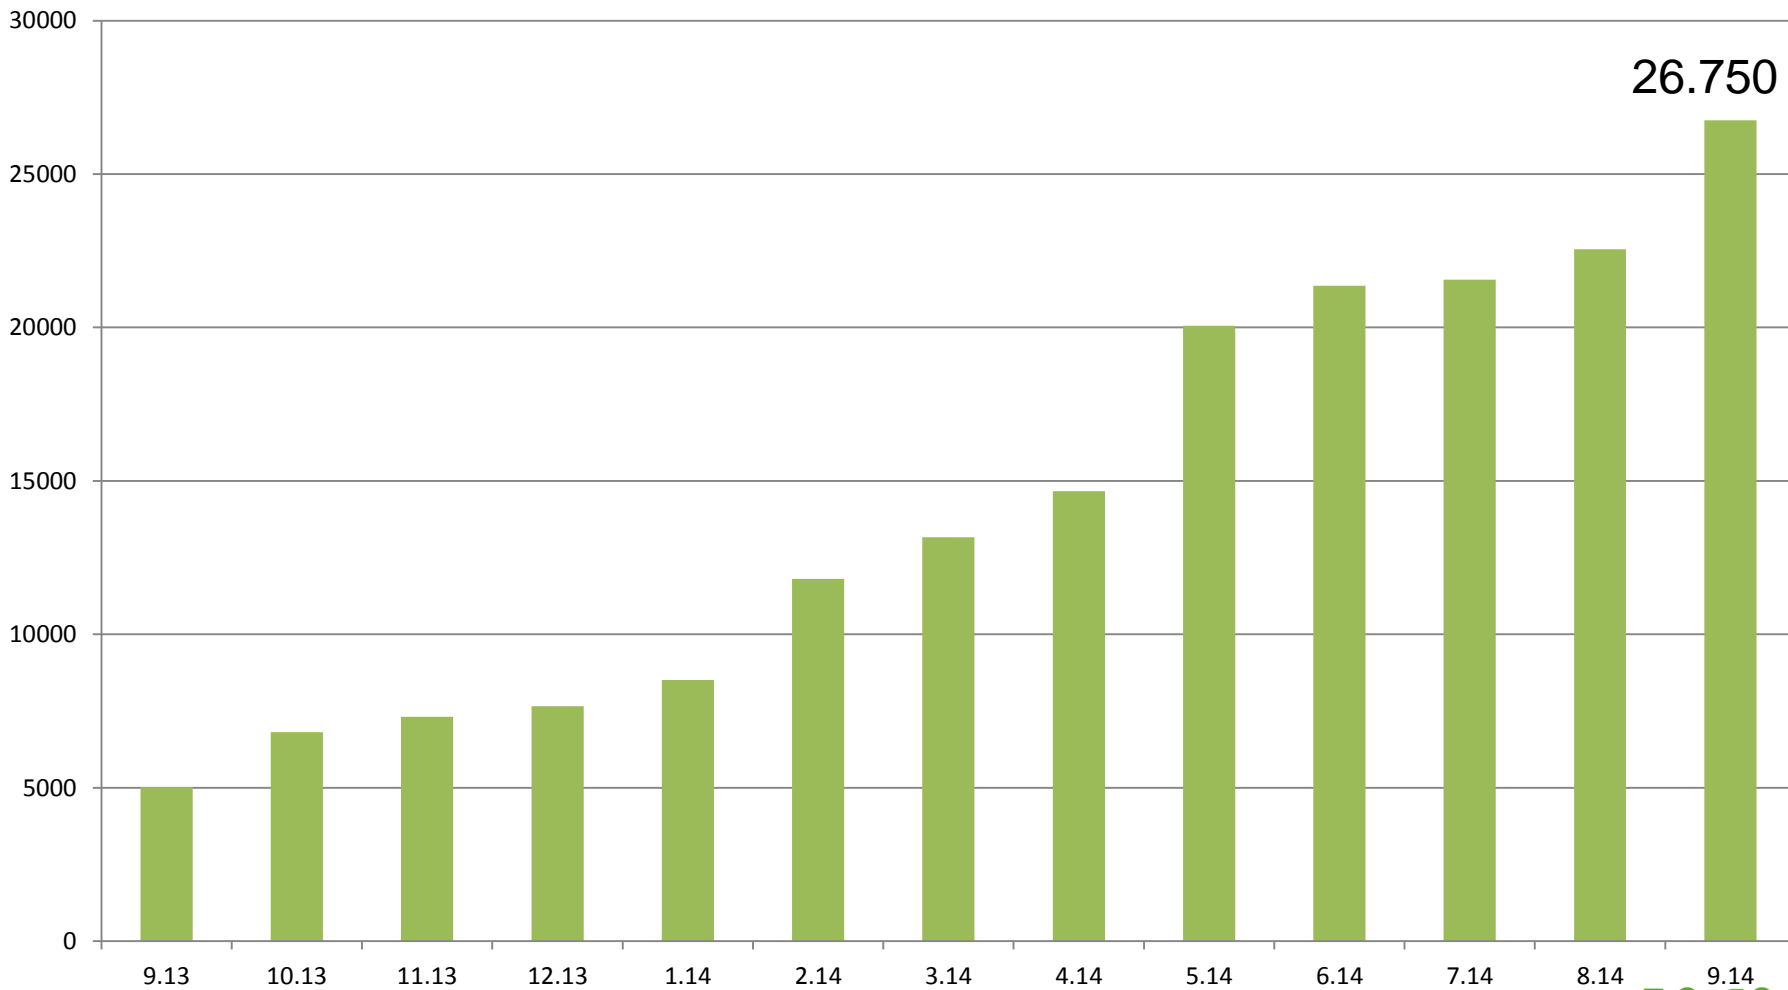

Market adoption

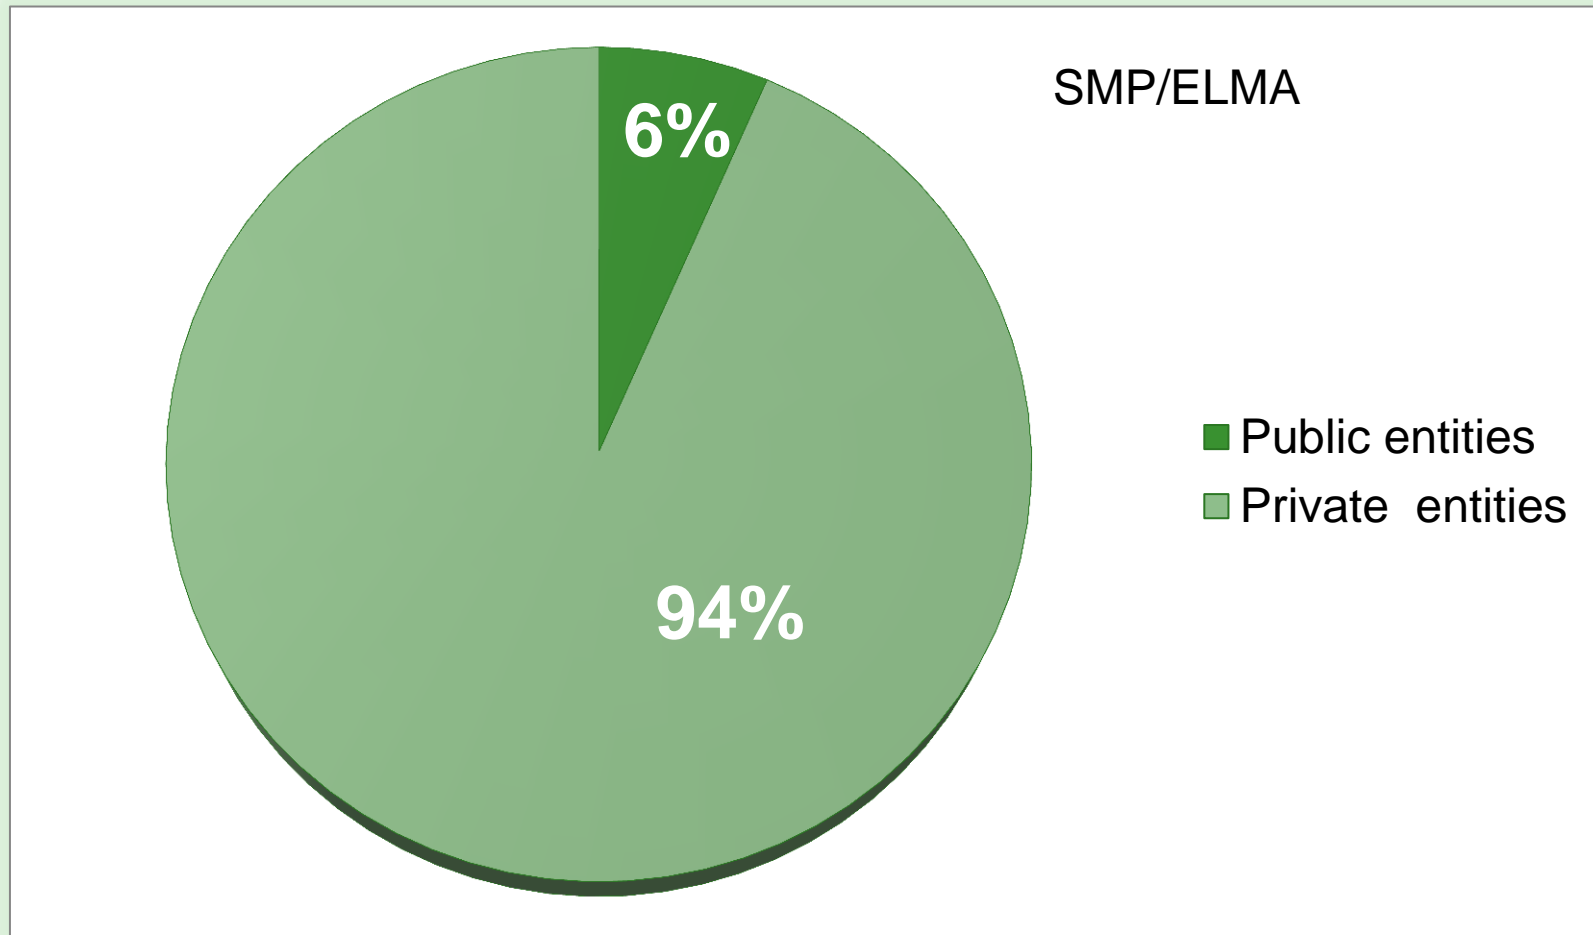

Norwegian invoice receivers

Invoice receivers

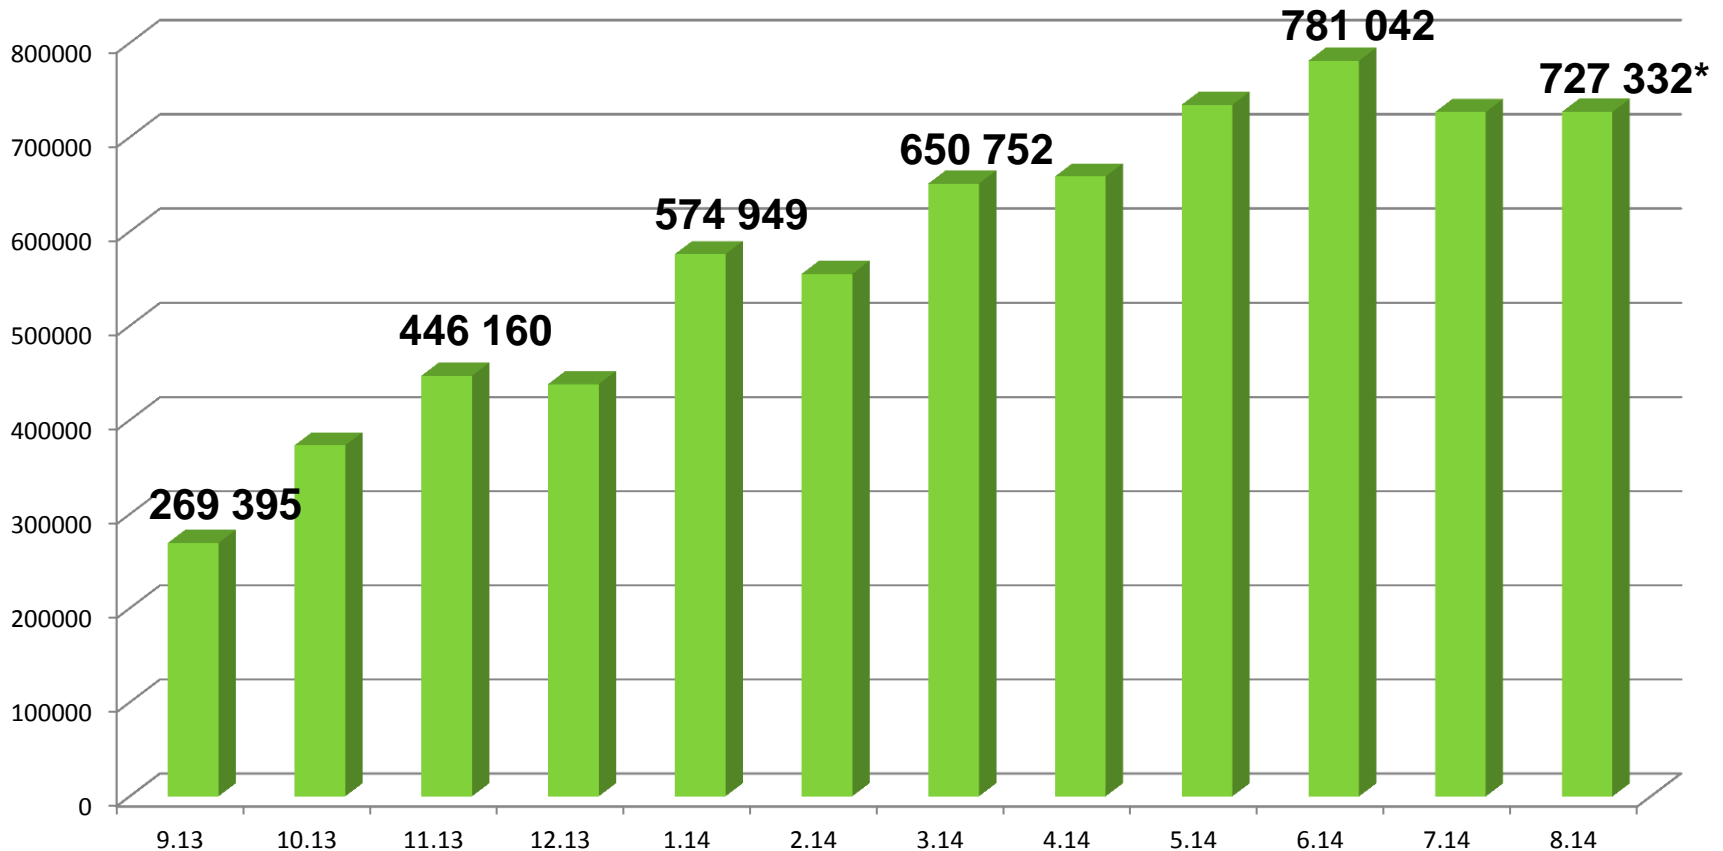

A solution for Public and private entities

Number of transactions

Number of invoices

* Missing some reports

Lesson learnt

Lesson learnt

- **Legislation** of eInvoicing.
- Civil servants must **demand** eInvoices.
- **Communication** with market :
 - eInvoicing systems (ERP vendors).
 - Access points(VAN, banks and others).
 - SME/sole traders.
- Facilitates **Cross** border many-to-many communication.
- Provide **support** for the users of Access Point services.
- Help industries and assist with **effective use** of the formats.

Thank you for your attention
